

ABOUT THE REPORT

In recent years, there has been a clear increase in interest in non-financial data provided by companies. They are taken into account increasingly more often when decisions are made by various stakeholder groups, including investors. Therefore, apart from the financial statements, the Agora Group has been preparing a separate report on non-financial activities for several years. **“The Responsibility Report for the year 2020 Agora Group and Agora S.A.”** is the fifth such report prepared by Agora. The reports are prepared on an annual basis, together with the annual report on the activities of the Agora Group and form a separate part thereof. The previous report covered 2019 and was published in March 2020.

The Report contains key non-financial data related to the activities of the Agora Group and Agora S.A. and information on our responsibility towards **employees, the public, the market environment** and the **natural environment**. It also takes into account the issues related to **respecting human rights** and **anti-corruption**. The individual chapters of the report present the management approach, including a description of key policies and internal regulations implemented in the Agora Group with respect to the aforementioned areas of responsibility and the due diligence procedures implemented.

The Report has been prepared on the basis of the international standards of non-financial reporting, the **GRI Standards**, at the CORE level, without external verification.
